- Database Management System (Oracle 8.x/9.x, SQL Server 2008, MySQL)

PROJECTS

Carpool (RMC Hackathone project) :

In this project we developed an Application for users and a web panel for Admin.If a person is going from one location to another with car or bike alone then by using our application he simply provide ride to other person who also want to go to that same location, he just has to enter his source and destination location. In this RMC Hackathone we Got Second Rank and won ₹30,000 price.We were 6 members in Team.

Smart Society Management (Gujarat hackathone project) :

This project is based on the tasks that we made by paper in society that all will be done by application.This problem statement was given by Gujarat hackathone and we developed an application for society members and web panel for secretary. In Gujarat hackathone we reached to the Final round.We were 8 member in First round and 5 members in second round.

ProfMatch :

This is our final year project of Diploma. This project is based on teacher and student. If student want to find a tutition so student just need to search on our application they need to give subject name and location based on that the list of teachers will be displayed after student can easily book or direct contact that teacher. We made an application for student and web panel for teacher and admin.We were 3 members in team.

Wallpaper App :

In this Application we can set a high quality wallpaper on mobile. in this different categories are also provided. We can also search for any wallpaper.

Covid 19 Tracker AppCovid :

This application is shows Total cases , new cases , total deaths , new deaths , total recovered , new recovered , total active cases of corona. We can also show this data of different countries.

News App :

In this i made an application that shows latest news to users. It shows trending news and i also add different categories like sports , entertainment etc. so user can easily read news based on their likely category.
